## SKILLS

---

Programming Languages:	Typescript, Javascript, Java, Solidity
Libraries/Frameworks:	React, NodeJS, ExpressJS, Prisma, NextJS, React Native, TailwindCSS, Shaden UI, EthersJS, Wagmi, Viem
Tools / Platforms:	Vercel, Docker, Supabase
Databases:	MySQL, PostgreSQL, MongoDB, Firebase, Supabase

## PROJECTS / OPEN-SOURCE

---

### **HungryBera NFT Minting | [Link](#)** *Typescript, NextJS, Web3, Viem, Wagmi*

With this project, the client aims to launch Priority and Public NFT Mint

The launch was successful and the NFT Collection became the top 1 in OpenSea for a short time.

### **GadgetSehat | [Link](#)** *Typescript, React Native, Kotlin, Firebase*

GadgetSehat is an application that can monitor a user's Device / Gadget, to give reports and recommendations about how to keep optimal gadget usage.

Due to the lack of available React Native Library for monitoring the Device's screen time, I'd rather create React Native Module from scratch with Kotlin, with the help of ChatGPT and basic knowledge of native android development

**GitHub Link:** <https://github.com/iyansr/GadgetSehat>

### **LuvFromMe Mobile App | [Link](#)** *Typescript, React Native*

LuvFromMe is a Send Greetings application that aims to make Greetings memorable.

### **ZIS Indosat | [Link](#)** *Typescript, React, ExpressJS, Prisma, MySQL*

ZIS Indosat is Crowdfunding Platfrom
